CABOT'S
Greosote Shingle Stains

HOUSES, BARN, STABLES, FENCES, SHEEDS, AND for all rough woodwork, especially shingles. They are softer and richer in color than any other stain to apply, wear better and look better, and are so easy to clean, that they can be used on the wood and not on the surface. Cabot's, their chief ingredient, is the best wood preservative known. Mr. C. H. Lytle's new house is stained with our Moss Green. No. 302.

CABOT'S SHEATHING "QUILT"

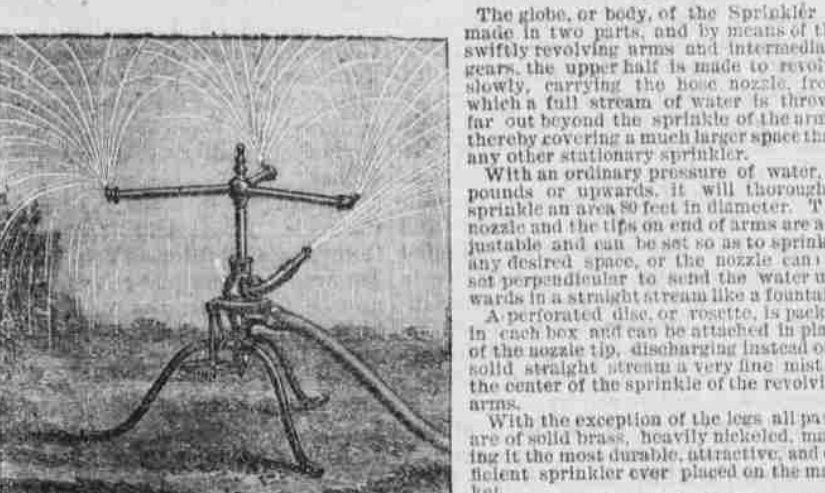

MAKES WARM HOUSES.

A cheap house can be made proof against Jack Frost by a layer of this Quilt, costing less than a foot. Partitions and floors lined with it are also sound proof. Samples of both materials, with circular and full information, will be sent on application to the manufacturer.

The "Twin Comet" Lawn Sprinkler.

The globe, or body, of the Sprinkler is made in two parts, and by means of the swiftly revolving arms and intermediate gears, the upper half is made to revolve slowly, carrying the hose nozzle, from which a full stream of water is thrown far out beyond the sprinkler of the arms, thereby covering a much larger space than any other stationary sprinkler.

With an ordinary pressure of water, 20 pounds or upwards, it will thoroughly sprinkle an area 30 feet in diameter. The nozzle and the tips on end of arms are adjustable, and can be set so as to spray any desired space, or the nozzle can be set perpendicular to the water in a plane, and a perfect disc or circle is produced in the water, discharging into a solid straight stream a very fine mist of water, making it the most durable, attractive, and efficient sprinkler ever placed on the market.

Height, 17 inches. Weight, 6 pounds. Will sprinkle an area four times greater than any other sprinkler made. Price, \$5 each. Sent C. O. D. by express, prepaid, to any address for the privilege of five days' trial.

The "Little Giant" Traveling Lawn Sprinkler.

This is an ingenious, efficient, and wonderful machine. Under an ordinary water pressure of 10 pounds or upwards it will drag 100 feet of garden hose and propel it slowly and continuously in either a straight line or a circle of any desired diameter, while its speed may be varied at will from 15 to 30 feet per hour. By means of a geared dial plate it may be set to travel any desired distance. A moment's pressure on the handle will stop it, and it may be changed to change its speed from the highest to the lowest, and it may be caused to distribute a spray effectively over a swath varying from 5 to 30 feet, while by simply throwing it out of gear it is instantly converted into a stationary sprinkler of exceptional efficiency.

The propelling force is supplied by back pressure of water in the arms causing them to revolve with force and rapidity, while at the same time they throw out a fine spray. We give a written guarantee to cure permanently any case with three boxes, or refund the money with 10 per cent. interest. "Little Giant" is not a substitute, but a scientific cure, that cures without the aid of will power and with no inconvenience. It leaves the system as pure and free from nicotine as the day you took your first cure or smoke.

Eureka Chemical & Mfg. Co., La. Crosse, Wis., Gentlemen: For forty years I used tobacco in all its forms. For twenty-five years of that time I was a great sufferer from general debility and heart disease. For fifteen years I tried to quit, but couldn't. I took various remedies, among others "No-To-Tac," "The Indian Tobacco Antidote," "Double Chloride of Gold," etc., etc., but none of them did me the least bit of good. Finally, however, I purchased a box of your "Baco-Curo" and it has entirely cured me of the habit in all its forms, and I have improved thirty pounds in weight and am relieved from all the numerous aches and pains of body and mind. I could write a quire of paper upon my changed feelings and condition.

Yours respectfully,

Pastor C. H. Mabury, Clayton, Ark.
